DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-17, 19, 21-22 and 24-30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Leedom.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4, 6-12 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Casper '183.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18, 20 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leedom.

Leedom discloses in figures 1-2b a dose protector, substantially as claimed. However, Leedom does not disclose the sealing flap being a thermoset rubber. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the flap disclosed by Leedom could be a thermset rubber because it is a shape memory material and Leedom discloses using a shape memory material as a flap. The walls of the housing could be reversed to increase instead decreasing as the distance away from the pocket increases. The shutter 8 is considered to be a valve flap since it controls the flow of air into the housing.

Conclusion

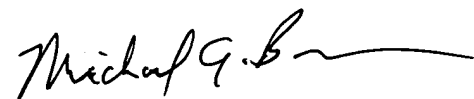

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kallstrand, Evans, Genova, Nowacki, Genova '173, Casper '496 and Casper '163, each discloses a dose protector.
